Don't Leave Your Microservices Strategy Incomplete: Unify with Pega Process Fabric

Greg Price
Senior Vice President, DPA Practice Lead, Virtusa

virtusa

The virtue of microservices is clear –
but is it enough to completely articulate to the business?

Gain visibility into the state of data

PegaWorld**iN**spire

Microservices solve for the nouns of the business...

But what about the verbs?

Business nouns

What is the data in its current state?

Customer

Policy

Opportunity

Order

Product

Business verbs

What are we doing with the data and _how_ did it arrive at this current state?

Change the customer's address

Rescind the policy

Convert from suspect to prospect

Where is my order?

Return the product

Simplifying process complexities with Process Fabric

WisMO PEGA

salesforce

PEGA Customer Service

ORACLE Supply Chain Management Cloud
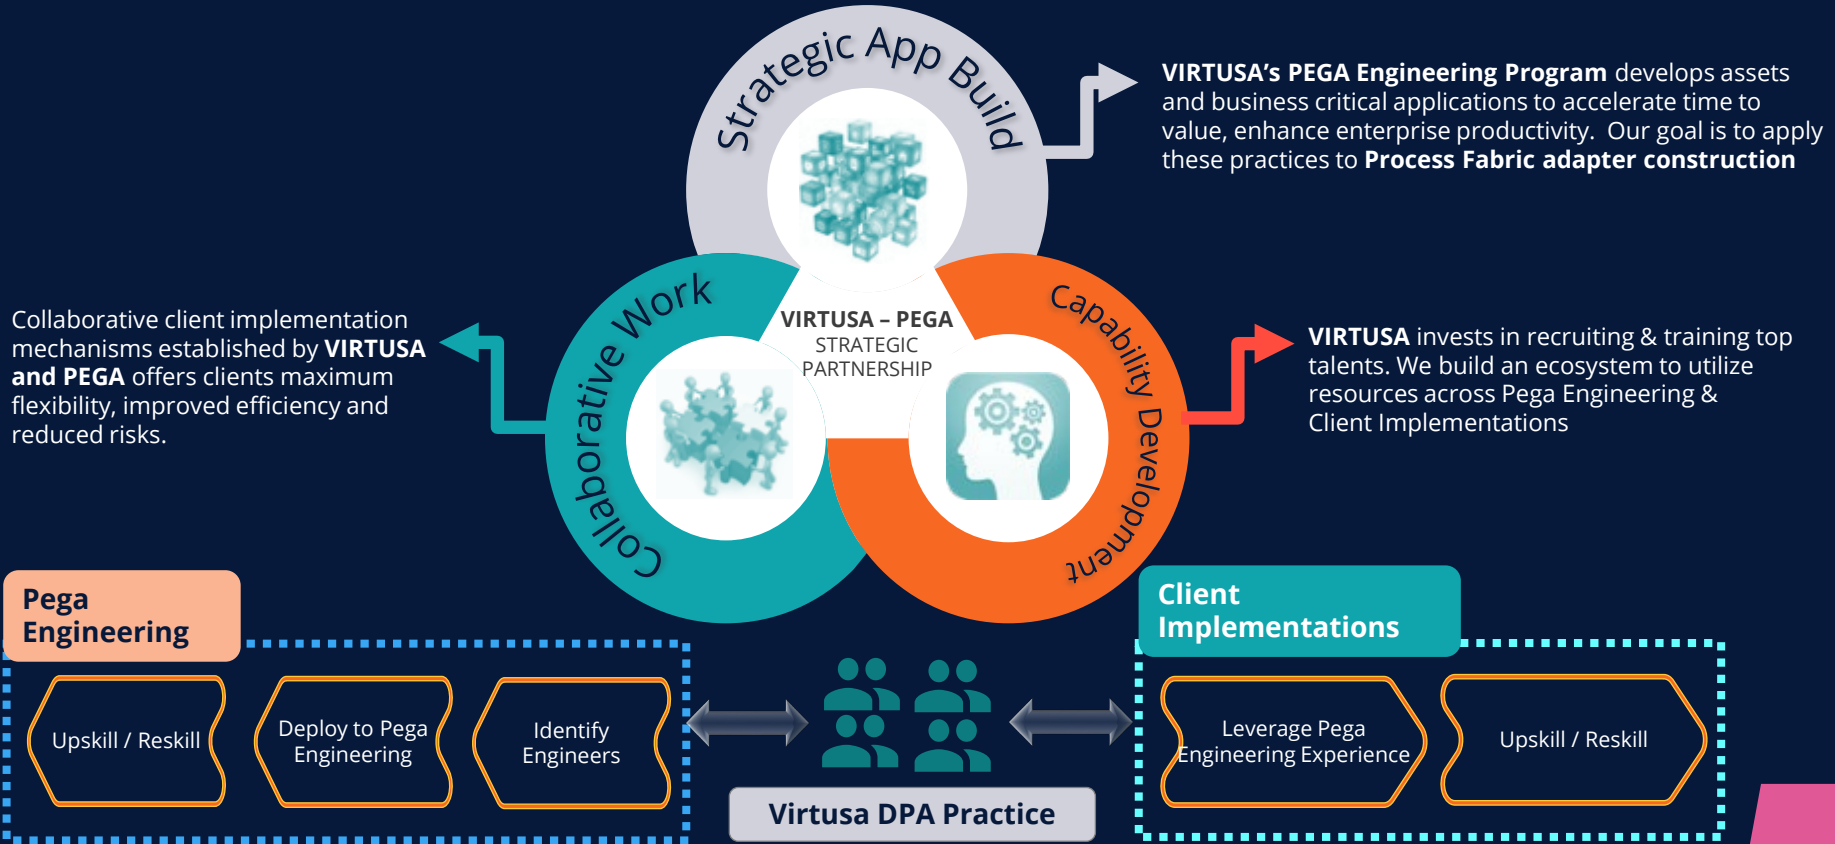

SAP

Who is the customer?
Where is the order?
Do we have inventory?

What do we need from our suppliers?
What are the financial ramifications?
What are we communicating?

PegaWorld iNspire

Gain visibility and get work done in one place

The interwoven worklist is of incredible value, but it is only the first step of potential
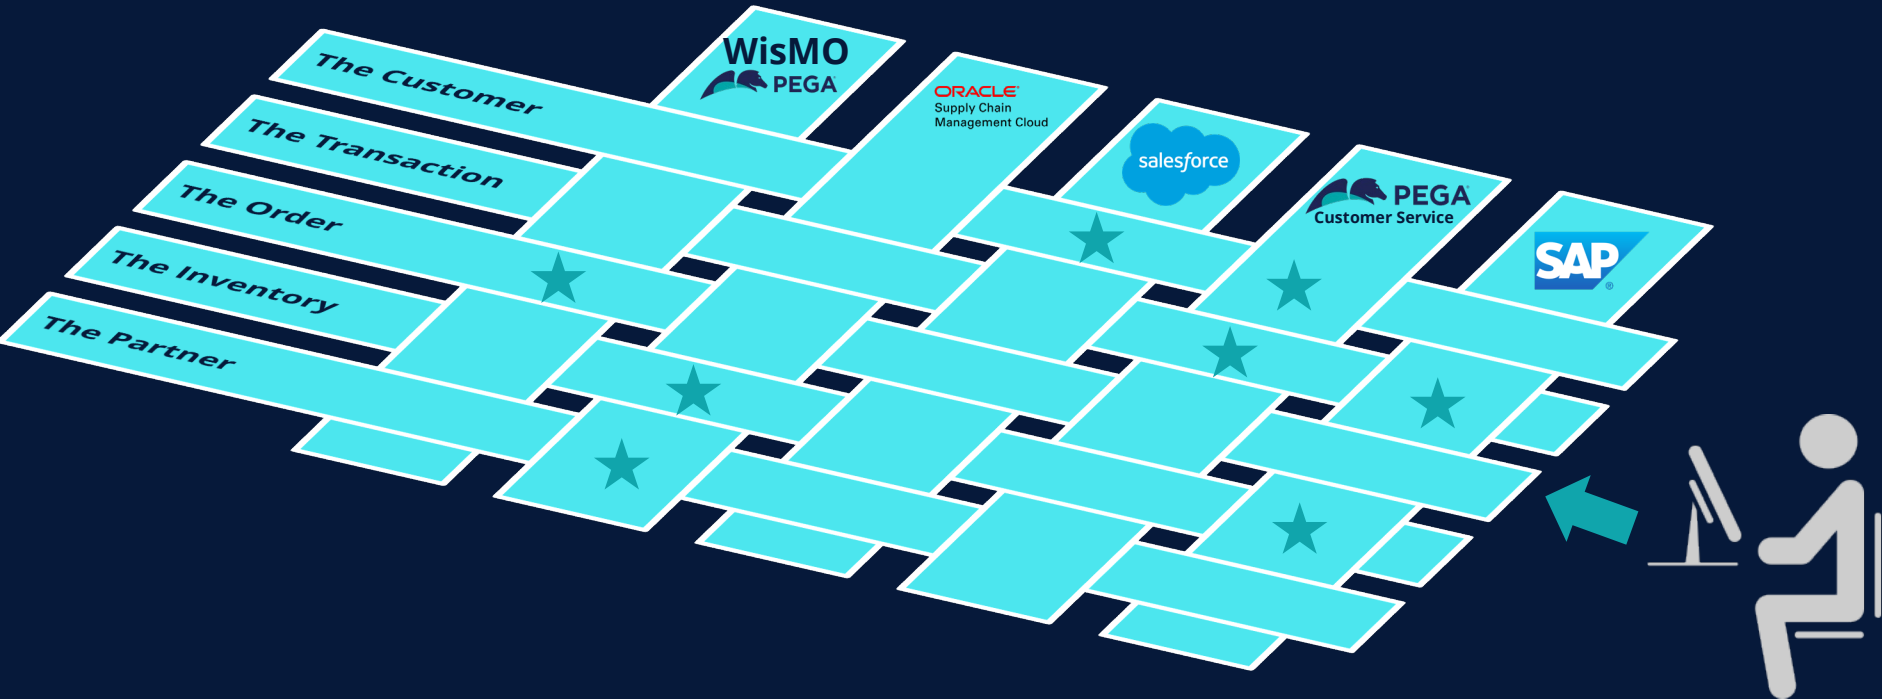

Virtusa: building out the vision for Process Fabric
