Siemens: Sustainable Procurement Performance Makes the Difference

How the SCM Sustainability Platform supports buyers in driving sustainability

Name: Alina Ciuciuc-Magarin

Position: Digitalization Expert

Company: Siemens AG

LinkedIn: [linkedin.com/in/alinacm](https://www.linkedin.com/in/alinacm)

Name: Tupac Celery

Position: Sustainability Expert

Company: Siemens AG

LinkedIn: [linkedin.com/in/tupacnc](https://www.linkedin.com/in/tupacnc)

We commute in cars designed with **Siemens software** ...

... built in factories running on **Siemens automation** ...

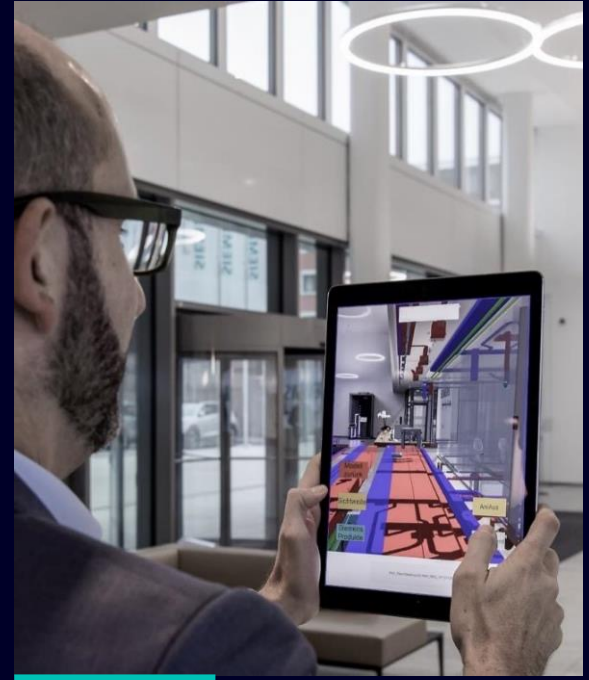

... and charged by a Siemens **smart grid**.

We work in smart buildings that **promote** our **health** and **safety**

...

... that use energy with **maximum efficiency** ...

... and connect the **physical** and the **digital** workplace.

We book our train tickets
with **Siemens software** ...

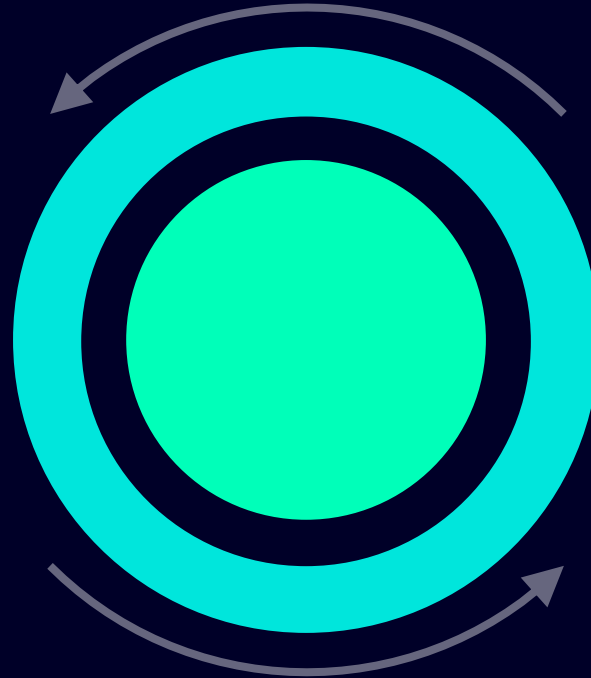

... to travel on **trains**
made by Siemens ...

... operated with Siemens
infrastructure technology.

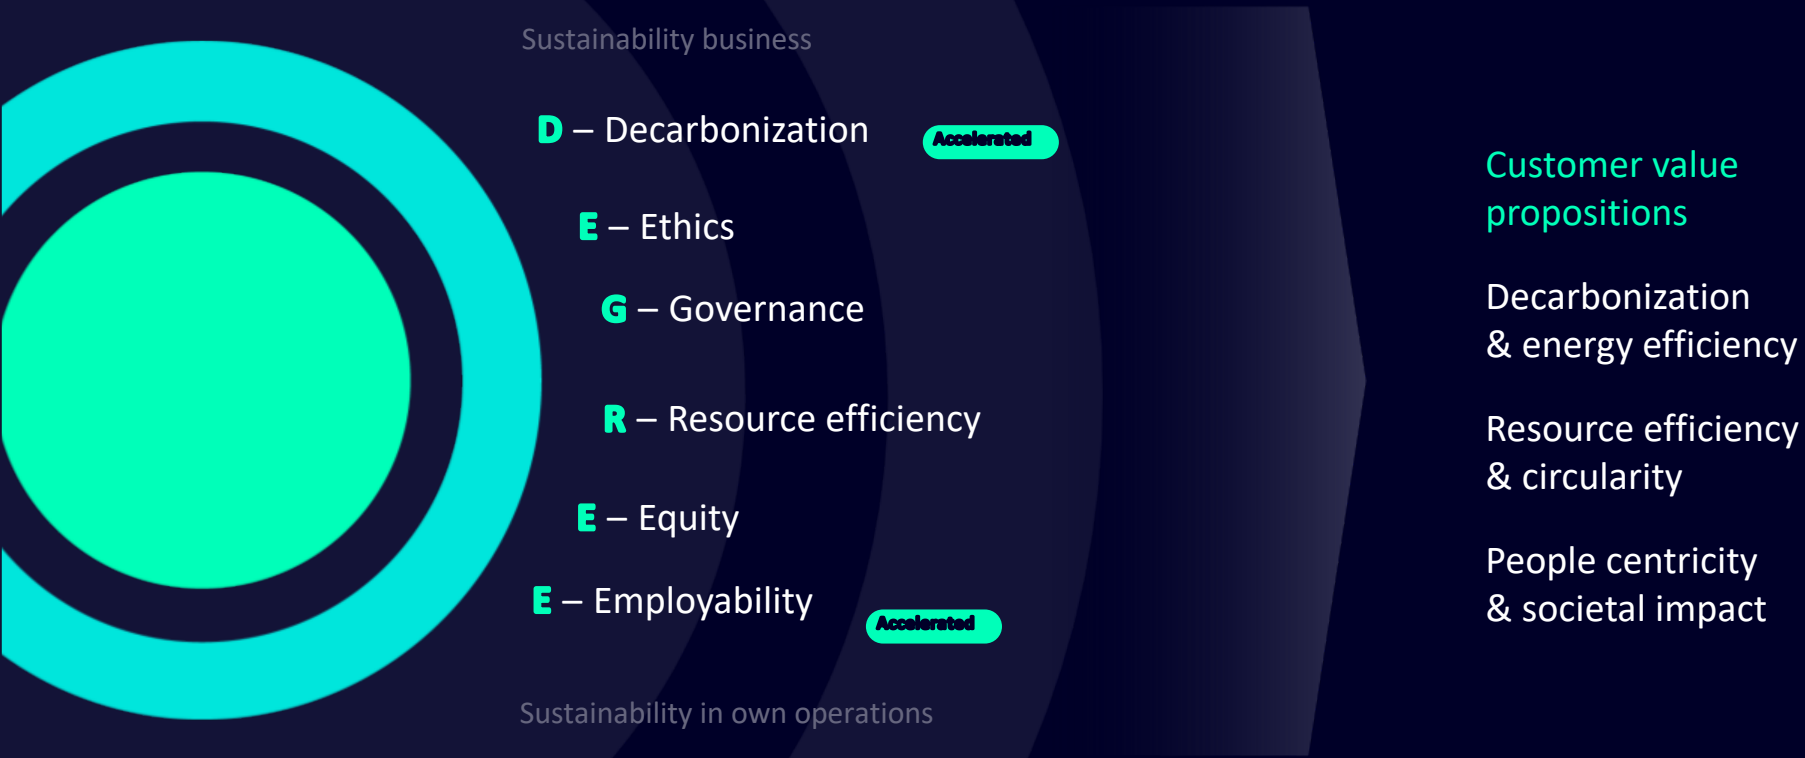

More than 90% of Siemens AG's business enables positive sustainability outcomes for our customers, by combining the real and the digital worlds

The
sustainability
opportunity

Sustainability
in our own
operations

Our DEGREE framework provides a 360° view on sustainability, ensuring that we lead by example fostering sustainability across our own operations and supply chain

Securing our supply chain by suppliers' commitment to our Code of Conduct and taking consistent steps toward a net zero supply chain by 2050

Impact through global supplier footprint

~67,700
Suppliers

~€37bn
goods and services purchased

~140
countries

Supplier engagement and collaboration as key enablers

Requirements for suppliers

Risk-based approach to identify and mitigate potential risks in the supply chain

Carbon Reduction Program

Collaboration with key suppliers based on insights about their decarbonization plans

Technology as the backbone to reach the sustainability targets

We can't do it alone - Supplier Engagement and a digital platform which supports us to improve the sustainability by triggering & monitoring appropriate measures

All sustainability information in one place

Comparison of sustainability performance

Trigger End to End sustainability processes

Drive supplier sustainability strategies

Welcome to the SCM Sustainability Platform (SSP)

Sustainability data about our suppliers is hosted in the SCM Sustainability Platform, which enables us to gather information from diverse sources

Sustainable Sourcing

All procurement employees in Siemens' can access globally available supplier sustainability information. This enables sustainability to serve as evaluation factor throughout the purchasing process.

Embedded sustainability Processes

We conduct evaluations of suppliers that range from supplier self-assessments of their own sustainability practices to on-site sustainability audits conducted by external auditors.

Supplier Transparency & Development

We remain committed to our supplier partnerships and these processes give us the basis to understand & discuss the sustainability **performance** and to help them improve.

Sustainable Sourcing: The Sustainability Score indicates a Supplier's Sustainability Performance and is part of the sourcing decision.

To achieve the required level of transparency, we have a decentralized Carbon Web Assessment process in place where our buyers and suppliers play a vital role

Highlights of this approach:

- **Collaboration is key:** Start the dialogue with your key suppliers and relevant cross-functions. Involve the buyers!
- **Focus on hotspots & quick wins:** Prioritize the highest emitting suppliers / commodities and build momentum with easy measures
- **Anchoring in sourcing processes:** Include the evaluation of supplier's decarbonization performance along the process
