Center-Out Business Architecture

AI-powered decisioning and workflow automation powered by case management

CHANNEL INDEPENDENCE

Extend across all your digital channels with DX API

LAYERS OF REUSE

Specialize by product, customer, region with the Situational Layer Cake™

DATA VIRTUALIZATION

Consume any local or enterprise data source with Live Data

Low-code Platform, Built For the Enterprise

From governed citizen development to mission critical applications

On a proven low-code platform

What's inside our center-out business architecture

Workflow Automation Powered By Case Management

Low-code app studio enables business and IT to collaborate to create the right workflows

Define the processes, people, and data with workflow automation powered by **case management**

Add AI powered automations and decisions into any workflow

The screenshot displays the Pega App Studio interface for configuring a microjourney. The top navigation bar includes 'APP STUDIO', 'Application: HR hub', and 'Preview application'. The main content area is titled 'Microjourney' and shows a process flow with four stages: 1. Collect resume, 2. Screening, 3. Interview, and 4. Decision. Each stage contains specific steps and actions, such as 'Submit web', 'Screen & schedule', 'Interview', and 'Decision'. The interface also shows 'Personas & Channels' and 'Data' sections, which are detailed in the callouts on the right.

1. Collect resume	2. Screening	3. Interview	4. Decision
Submit web + STEP 1. New submission PARALLEL Submit Mashup + STEP 1. New submission + STEP	Screen & schedule + STEP 1. Review candidate info 2. Phone screen 3. Screening outcome 4. Schedule interview 5. Send reminders + STEP	Interview + STEP 1. Sign NDA 2. Rank candidate + STEP	Decision + STEP

Personas & Channels

Personas	Channels
Candidate HR portal (MLP 2)	Recruiter HR portal (MLP 1)
Recruiter HR GO mobile (FUTURE)	Recruiter HR portal (MLP 1)
Candidate Facebook (FUTURE)	Manager HR portal (MLP 2)
	Manager HR portal (MLP 2)
	Manager Email (FUTURE)

Data

Data Sources	Data Fields
Applicant info Pega (MLP 1)	Applicant info Pega (MLP 1)
Applicant info LinkedIn (MLP 2)	Job opening Pega (MLP 1)
Resume Pega (FUTURE)	Resume Pega (FUTURE)
	Resume Pega (MLP 2)

Define the **stages** and **steps** required to achieve your outcome

Define the specific **people** and **channels** engaged in each unit of work

Define **data sources** and **data fields** required for each workflow

Intelligent Workflow Automation

Leverage RPA and AI to automate tasks and optimize future process execution

Define the processes, people, and data with workflow automation powered by **case management**

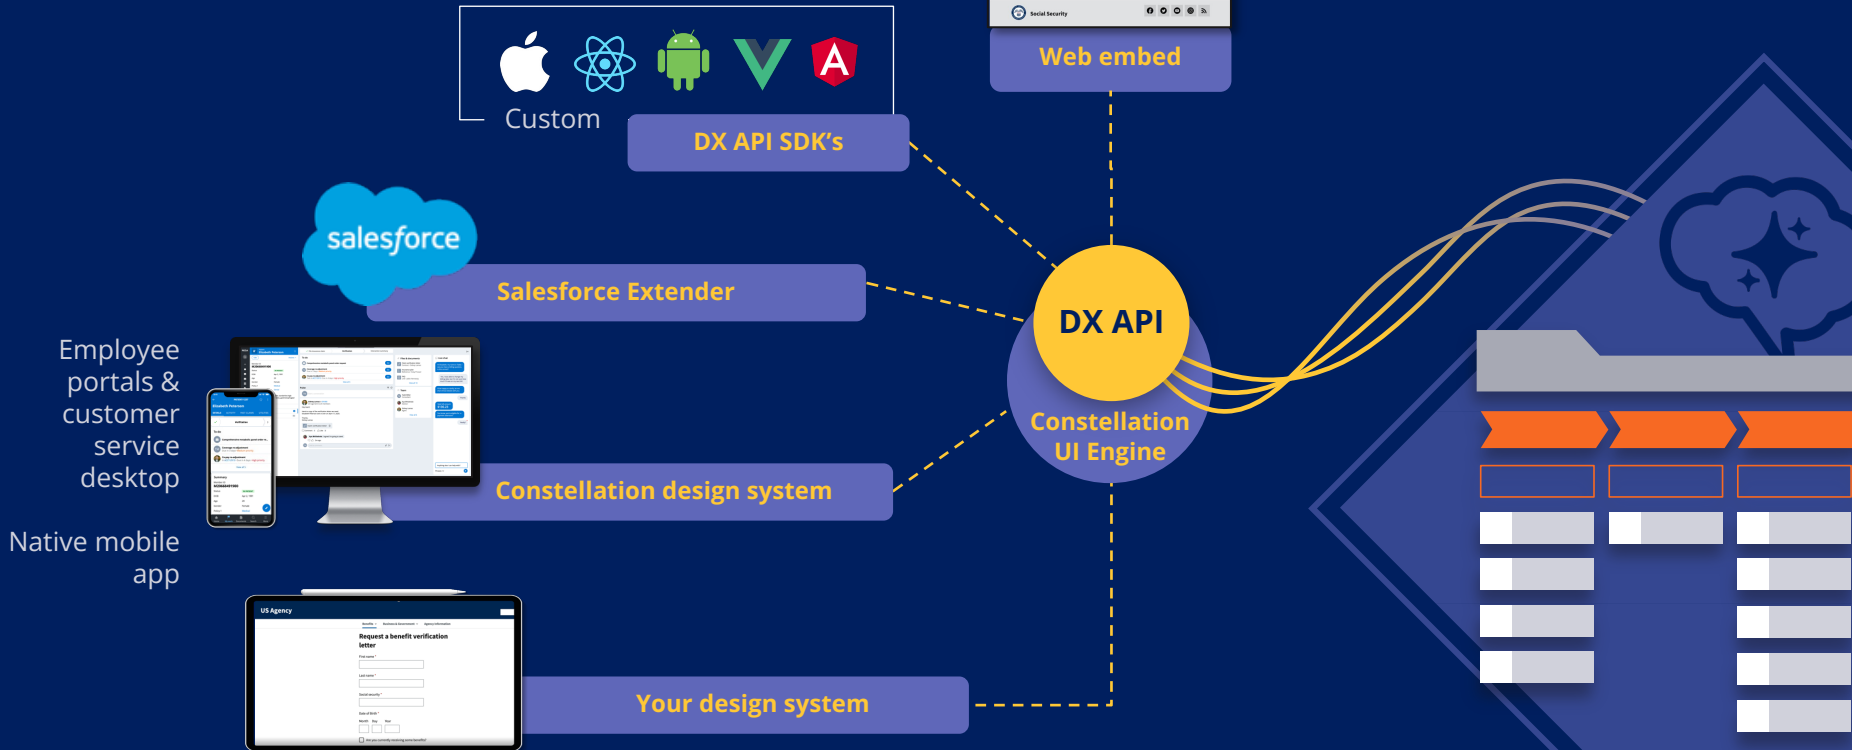

Add AI powered automations and decisions into any workflow

The screenshot displays the Pega App Studio interface for a 'Job Applicant' case type. The workflow is divided into four stages: 'Apply for job', 'Screening', 'Interview', and 'Decision'. The 'Screening' stage includes steps: '1. Review candidate info', '2. Phone screen', '3. Screening outcome', '4. Schedule interview', and '5. Send reminders'. The 'Interview' stage includes '1. Sign NDA' and '2. Rank candidate'. The 'Decision' stage is currently selected. Two callout boxes are present: one for '3. Screening outcome' with an AI icon and the text 'Drive decisions with AI', and another for '5. Send reminders' with an RPA icon and the text 'Drive work with automations & RPA'. The interface also shows 'Personas & Channels' and 'Data & Systems' sections.

Channel Independence

Extend across all your digital channels

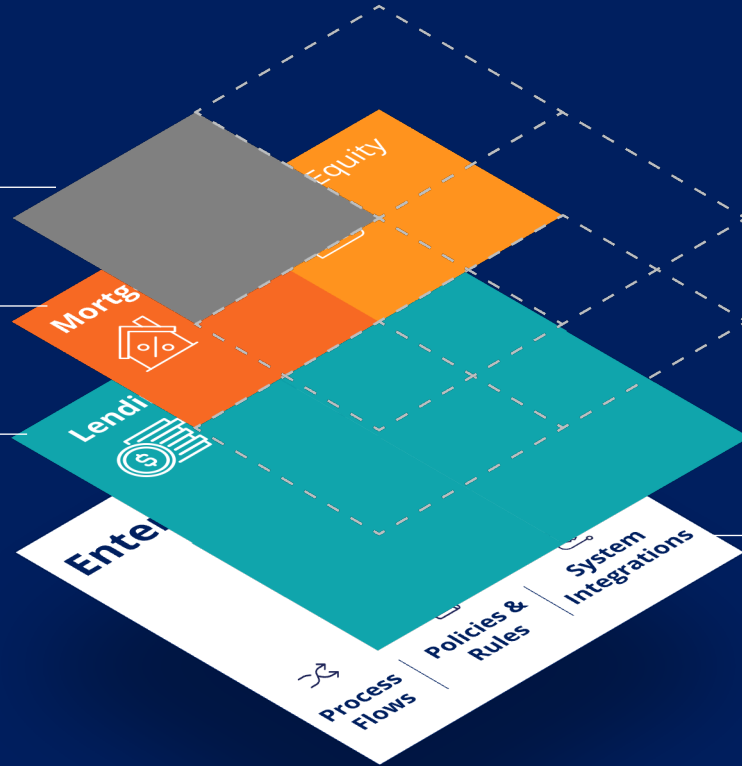

Self-service

Build Layers of Reuse and Adapt With Ease

Simplify creation and management of process variations by product, segment and region

- Manage variations by region
- Create instances for different loan types
- Create “lending” layer for common loan process flows and integrations

Create “enterprise” layer as baseline for common process flows, policies and core system integrations

Data Virtualization

Consume any local or enterprise data source with Pega Live Data

What Makes OUR Real-time AI... Real?

Real-time AI to Power Your Enterprise

Application development

Customer engagement

Customer service

Back office
